-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on Nov 22, 2005 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 4, 16, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Takahara et al., U.S. Patent 4,468,978.

Takahara et al. shows, in Figs. 3-6, a vehicle steering wheel comprising a hub 20, a steering wheel rim 10 arranged radially distanced from the hub, and at least one spoke 30 having at least one spoke section, the steering wheel rim and the spoke comprising a structure, the structure having inner 12 and outer 16 parts completely spaced apart such that the inner and outer parts do not directly contact each other, and a vibration-decoupling means 14 for isolating vibration and bridging a distance between the inner and outer parts, so that forces from one of the

Art Unit: 3682

inner and outer parts are transmitted to the other one of the inner and outer parts via only the vibration-decoupling means, the vibration-decoupling means acting in all directions and isolating the steering wheel rim vibrations from at least one section of the spoke, the inner and outer parts being connected to each other by only the vibration-decoupling means and being otherwise completely disconnected, wherein the vibration-decoupling means is formed by a bearing; wherein the vibration-decoupling means is elastic, and the inner and outer parts are not integrally formed with each other.

Allowable Subject Matter

4. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chong H. Kim whose telephone number is (571) 272-7108. The examiner can normally be reached on Tuesday - Friday; 9:00 - 6:00.
